SUSTAINABLE**

[www.geomagworld.com](http://www.geomagworld.com)

# GEOMAG™

SCIENCE  
TECHNOLOGY  
ENGINEERING  
MATHEMATICS

Magnetism lies at the very heart of Geomag, facilitating building, encouraging exploration and creativity and allowing us to produce fun and stimulating platforms that reinforce positive learning.

Our vocation at Geomagworld is to encourage learning through play with our magnetic construction platforms and the magic of invisible forces.

Inspiration comes directly from teachers who spontaneously over the years have used Geomag products as teaching tools, creating a unique educational experience.

# GEOMAG™

**RECYCLED  
PLASTIC**

Since our toys are focused on the healthy development of our children, we feel equally responsible for the health and future of the environment that our children are growing up in.

### POWERFUL MAGNETS

### GEOMAG BOX

We have improved the quality of our magnets and designed a practical storage box made of 100% recycled plastic.

These new lines use selected recycled raw materials, thus minimising the use of natural resources and cutting waste.

BRAND ESSENCE

WHAT IS GEOMAG ABOUT?

# PLAYING WITH MAGNETISM SINCE 1998

In 1998 we invented the first magnetic construction toy:  
simple elements, such as rods and spheres, are held together  
by a magical force of attraction to build amazing structures.

**Magnetism is key to our philosophy of play and learn.**

A man with a beard and short hair is smiling and looking down at a stack of colorful geometric blocks (cubes and prisms) in shades of blue, yellow, red, and green. The background is a soft, out-of-focus indoor setting. In the top right and bottom right corners, there is a decorative geometric pattern of interconnected triangles and squares in a light blue color.

VISION

HOW DO WE SEE OURSELVES IN THE FUTURE?

# THE SWISS TOYMAKER EMPOWERING ALL GENERATIONS

We want everyone who plays with our toys, **regardless of their age**, to feel a spark of creativity, to learn through this experience and to simply **have fun**.

While our toys aim to contribute to the healthy development of our children, we feel equally responsible **for the future of the environment** that we are living in and make every effort to ensure we run a **responsible and sustainable business**.

MISSION

HOW DO WE ACHIEVE THIS?

# DESIGNING & PRODUCING MAGNETIC TOYS THAT UNLEASH HIDDEN TALENTS

Our toys help **develop and train the mind** and imagination and are based on open play systems that provide an infinite number of inventive options to promote **free building** and stimulate creativity.

POINT OF DIFFERENCE

WHAT MAKES US UNIQUE?

# PLAYING WITH INVISIBLE FORCES

Magnetism is just one of the many **natural invisible forces** that bring life to the Geomag platforms: **creativity, intelligence, the human mind**, and even **gravity** cannot be seen but they all make the play activities with our Swiss made toys fun educational experiences.

**RECYCLED  
PLASTIC**

# PLAYING TOGETHER FOR A HEALTHY PLANET

We presented in 2020 a new revolutionary green range:  
a market-leading innovation that both our consumers  
and the planet will appreciate!

**2021  
ALL NEW  
LINES ARE  
MADE OF  
RECYCLED  
PLASTIC**

# OUR PRODUCTS HAVE BEEN AWARDED THE STEM APPROVED™ CERTIFICATION BY STEM.org

STEAM learning is an interdisciplinary approach to learning where children apply science, technology, engineering, art and mathematics in contexts that represent real-life experiences and applications.

## ART

Construct and deconstruct each episode of the fairy tale before inventing your own story. Think and build in all directions to develop spatial awareness. Live, feel and recreate the emotions of the characters.

## SCIENCE

Understand magnetic fields and how to increase and decrease the push and pull magnetic forces and to put these to good use.

## ENGINEERING

Explore the use of ball-bearings to create low-friction movement.

Combine rotational movement with push and pull magnetic forces.

## TECHNOLOGY

Concepts of stress and tension come to life as you build your own model. Explore the effect of triangulation on structures.

## MATHEMATICS

Recognise symbols and numbers in a playful environment. Enjoy a hands-on, creative approach to maths as you build a 3D network of interlocking sums.

## LET THE MAGIC IN!

**Magicube** is the new range of Geomagworld products that has revolutionised the Junior Construction category.

This innovative toy is a building system made up of magnetic cubes that attach to each other on all six sides. By harnessing the invisible and magical properties of magnetism, children can give free rein to their imagination as they build colourful 3D models.

By playing with the individual cubes, even the youngest of children begin to develop their first manual skills. Our new Magicube Recycled collection with 100% recycled plastic has the same bright colours and high quality standards as all our original Geomag sets.

# MAG I CUBE™ SHAPES

**100%  
RECYCLED  
PLASTIC**

What started out as the Original Magicube system has now become a world of magnetic building blocks with the addition of three new shapes: the half cube, quarter circle and the half sphere.

The construction possibilities are boundless and your imagination will fly higher and higher! Characters, animals, structures: you will be surprised how many things you can invent.

But there is more: our desire to create a new magnetic world has gone as far as building vehicles with real wheels that magnetically attach to the blocks. A simple, magical system, just like all our magnetic constructions at Geomag.

# LEARNING SETS

From years of experience with schools all over the world, we have created a line of products for learning by playing at home using Magicube. Our magnetic cubes form the basic 2D and 3D structures and from there, kids can enter the world of mathematics and language. With the Theatre set, we stage the much-loved fairy tale "The Three Little Pigs".

# LET YOUR IMAGINATION FLY!

With **Geomag Classic**, you can build endless 3D structures, thanks to the magical forces of magnetism, unleashing creativity and imagination as you play.

The magnetic rods, steel spheres and panels of different shapes form the magnetic construction system that has made the brand famous all over the world. The Classic range consists of different product lines (**Color, Panels, Rainbow, Spin, Glitter, Pink, Glow**) that, thanks to the panels and different colours, allow you to create bigger and more stable structures, stimulating your curiosity and imagination. Our new Classic Recycled collection with 100% recycled plastic has the same bright colours and high quality standards as all our original Geomag sets.

# GEOMAG™ CLASSIC

**100%  
RECYCLED  
PLASTIC**

The highest standards of environmental sustainability for Geomag's Classic magnetic construction system.

Magnetic rods, panels and the bases made using 100% recycled plastic.

Powerful magnets, quality materials, strong constructions, great colours: 100% Geomag.

Yet another amazing novelty: our new storage box, a practical, durable pocket-sized box for the rods and spheres – naturally in 100% recycled plastic.

Our cardboard boxes also have a high percentage of recycled materials.

Further detailed information found on the packaging.

# MECHANICS

## GRAVITY & MAGNETIC MOTION

**Mechanics** is the construction platform that combines the forces of magnetism with a world of mechanical construction, to stimulate creativity, inventiveness and ingenuity. In addition to the classic magnetic rods and steel spheres, Geomag Mechanics adds mechanical elements within the constructions, expanding the play possibilities: some parts of the structures are able to rotate, triggering chain reactions from the magnetic attraction and repulsion.

In 2018 the innovative **Mechanics Gravity** platform was launched, consisting of a series of incredible solutions that harness the forces of gravity and magnetism and set the Mechanics models in motion.

# GROW UP TOGETHER

**Geomag Pro-L** is the evolution of the original Geomag magnetic construction system. Designed for those who love a challenge, the Pro-L line allows you to create more complex models and structures thanks to the greater strength of the magnets.

We have built-in visible polarity indicators on each rod, which means you can grasp the full potential of magnetism and build more quickly, pushing the boundaries of the laws of physics.
