Dear B2B partners

I hope you're doing well. I wanted to take a moment to share some highlights from the past year at Betzold, where we've faced some global challenges, like worldwide inflation. But through it all, we've seen something amazing: the education sector keeps thriving, despite tough times in the world economy.

We believe that children are the future, and that's why we're so proud to support education. Looking back on the past twelve months, we see a lot to be thankful for.

First, we've been busy keeping up with new trends and creating new products for our treeNside green line. These innovative products have been an overall hit with educators, students and children alike, thanks in no small part to your feedback and support.

In 2024, our efforts in sustainability and energy efficiency were recognised with an award. This is a testament to our commitment to making environmentally-friendly choices, and we'll keep pushing forward in this direction.

Our new shop system designed especially for you, our B2B customers, was a big hit. It made it easier for you to access the products you need, and we're thrilled to see how much you've liked it. We are continuing to work diligently on our logistics concept for the future to become even faster and more efficient. Your satisfaction is our top priority, and we look forward to bringing you even more improvements in the coming months. Thank you for your continued support and partnership.

As we step into 2025, we want to express our gratitude for your trust and partnership. We're excited about what the future holds and we're looking forward to continuing to support your business needs.

Wishing you a great start to the new year!

Warm regards

Ulrich Betzold

COUNTING FRAME, treeNside

This maths frame has been specially developed for school beginners to help them take their first steps in maths. A modern take on the classic counting frame, it is made from treeNside, an environmentally friendly bioplastic. It is sturdy yet lightweight and fits into any school bag. The large beads are easy for children's hands to grip. The material is pleasant and the gentle smell of wood gives a natural feeling.
