*Christmas 2022*

*play With me*

## OUR ROOTS

**Ludattica**® has developed at the heart of the Educational Group, an Italian company that is specialised in the creation of books for children, play books and high-quality educational games. Our roots are firmly anchored to Professor **Giuseppe Lisciani**, a highly experienced educationalist in the field of research and training in child learning strategies.

## EDUCATIONAL VOCATION

Learning and the improvement of an individual's skills through recreational activities are the basis of the **Ludattica**® project. The firm belief that learning is a game, is a way of life that fills our thoughts and our hearts.

## INSPIRING PEOPLE

**Alessandra Lisciani's** intuition and experience continues to give continuity to the foundations of the business. Her team looks after the design, the choice of materials and the realisation of Ludattica products. The principle, which provides daily inspiration, comes from the awareness that our products have a fundamental role in determining the future of our children, their curiosity and their desire for discovery.

*play With me*

## PLAY WITH ME

Our games talk: they have been planned and designed to communicate with children and let them experience creative and unique recreational activities that are always different but always satisfying. At the same time the games encourage children to share the experience with others. "Play with me!" becomes and invitation for a friend, a parent, a grandparent and so on.

## MADE IN ITALY

We are Italian artisans of games. We follow the whole process from conception to production, which takes place in Italy following meticulous safety standards. The uniqueness, exclusivity and tradition of our Made in Italy games can be found in every Ludattica product.

## GREEN QUALITY

For us, quality means working on details: the choice of materials, attention to the contents, elegant illustrations, and great care for the overall product. Our games respect nature because they are made with eco-friendly and non-toxic components.

## GREEN LIKE LUDATTICA

At Ludattica, our passion for games born out of simple, natural materials joins with the research into technical, ingenious and innovative solutions to create sustainable alternatives to plastic materials. As for example the refined and precious containers in our games, that allow us to avoid using plastic bags.

## Our eco-friendly choices

### ● Playing with paper and cardboard

Creating, building, handling, transforming, inventing, growing. There is a whole world of paper and cardboard to discover! This is the guiding principle behind all our games made from eco-friendly, low environmental impact materials.

### ● Components of natural origin

We choose our components with care: we want them all to be natural, eco-friendly, non-toxic, and biodegradable. Some examples? 100% gluten free, vegetable origin modelling clay, dermatologically tested finger paints, non-toxic, washable ink pens, containers and accessories made from bamboo fibres and sugar canes that are compostable.

### ● Design sustainability, made in Italy

For us, being eco-friendly means making responsible design choices, which start with the planning phase of sustainable alternatives and follows the entire life cycle of our products. We don't like the idea of "throwaway" goods, and it is for this reason that our boxes are sturdy, and often are an integral part of the game itself. They last long, and can be used for a thousand other things!

### ● The advantages of a short supply chain

Manufacturing in Italy means that our company benefits from a short supply chain. We are able to check production processes and to manage packaging and transport processes carefully and responsibly. All of this with sustainability in mind.
