Quut®

say hello to *Quut*

Quut (pronounced as “cute” in English) was born end of 2012, as part of PARS PRO TOTO, a well-regarded Belgian design agency with more than 25 years of experience in designing and engineering innovative products and attractive brands.

With over 20 kids amongst us, we have gone through our fair share of beach toys over the years. Tired of the many poor quality beach toys that were on the market, offering no emotional connection, we decided to make our own brand.

Our goal was to create toys that would last as long as our memories spent at the beach. Toys with a real, durable and clever design that would offer fun and beauty for kids and parents. This is how Quut was born.

Today Quut stands for a wide range of products. Whether to be used at the beach, in bath or at home, they all have a great design in common!

Quut is on
a mission to
inspire the world
to play better!

5 values of Quut

Endless play

At Quut we want your kids playtime to be endless! We use top materials to allow our toys to be passed from one kid to another, and be cherished by multiple generations. Quut products are fun for all ages as they grow along with the developing stages of kids. Who's in for those endless summers of fun?

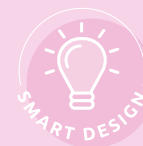

Togetherness

Quality toys for quality time. Enter your kids play zone and make some unforgettable memories together. Build sand castles with Alto, invent the craziest stories during bath time and curl up for some dreamy cuddles on our playmat afterwards. Quut toys inspire and encourage to play together. Let's start coloring those childhood memories!

Play to learn

Playtime that is more than only fun and laughter? Yes please! Quut toys boost your kids' creative skills by adding storytelling and imaginative play to the game. Piecing together small constructions with our bath sets and Blokki is not only fun and exciting, it also challenges important soft skills like problem solving, pattern recognition and color identification. Building on those strong fine motor skills during playtime, that's what we call 'toys with a difference'.

Smart Design

We all need some classics in our lives. Quut reinvents them, not just by making yet another copy, but by giving classic toys a full upgrade. We add a designy and clever twist, based on the needs of both parents and kids. Have you spotted our 3 smart design tricks yet?

- 1. Improving the ergonomics, so kids can keep on playing for hours on end. Check our Scoppi yourself to feel the difference!*
- 2. Rethinking the use, because there is always room for improvement. Finally a bucket that really doesn't spill water!*
- 3. Multidisciplinary for the win. Making products even more useful, by adding extra functions and play opportunities. A flying disk that is also a sand sifter? Twice as fun!*

Conscious production

When designing a new Quut product, it's not just about the look and feel. Durability is top of mind in every step of the product lifecycle. From design, production, packaging and transport up to use and afterlife. That's how we strive to move towards a more circular economy.

conscious production

When designing a new Quut product, it's not just about the look and feel. Durability is top of mind in every step of the product lifecycle. From design, production, packaging and transport up to use and afterlife. That's how we strive to move towards a more circular economy.

Monomaterials

The majority of Quut products are made of monomaterials. Pure, **high quality plastics from renowned suppliers that are 100% recyclable**. More solid and safe than any other. The best option for endless play

No single-use

Single-use is a no go. At Quut we continuously evaluate our way of working and try to optimize whenever possible. We recently moved from single-use displays to **re-usable** ones. Less transport, less waste and ultimately a more durable approach: let's go!

Transport

The fewer transport, the better. Right? **Both our products and packagings are designed for transport in the most optimum way.** Check our Bucki, which has its sieve on the bottom of the bucket, rather than on the top. Great stacking for shipping less air, more toy. By the way: easy transport also means easy storage in the shops, win win!

We ♥ our planet!

So what about Quut plastic toys?

Quut toys are worth cherishing and made to last a very long time. Day after day, season after season, child after child, ... And it's possible! Because they're made of synthetic material. Of pure, hard-wearing plastic. Your customers may question the choice for this raw material. That is why we have summarised our philosophy and core values in three FAQs. Just a few clarifying anchors so you can inform your customers correctly.

Why use plastics instead of bioplastics?

Because classic synthetic materials are a top choice when responsible and sustainable use is required. They offer the best odds of 100% re-use when recycling and they are still unsurpassed in terms of quality and safety.

Conversely, most bioplastics are not sustainable enough for our purposes. The BIO characteristics do not live up to their promise yet. In fact, their ecological footprint is one and a half times bigger than that of traditional plastics. For instance, the transformation of corn into plastic requires more energy than turning oil into plastics. The world doesn't benefit from the biodegradable properties either. Not a single type of plastic is fully biodegradable in nature. Efficient degrading requires industrial composting installations and therefore lots of energy.

So there's not much BIO left in the process. A circular economy. That is the future we work towards and the ideal we believe in.

Is Quut made of recycled plastic?

Not yet. For the simple reason that today's recycled plastic streams are often a mix of different kinds of plastic. And that calls into question their quality, safety and availability. Unfortunately these are precisely the properties to which we attach the greatest importance.

That is why we only use pure plastics from a known source and this is clearly indicated on our packagings. All our products are tested thoroughly, not just in terms of safety but also for play value, hygiene and child-friendliness. In our philosophy this is the only way to offer top-quality toys. Naturally we always keep our finger on the pulse. If we come across a high-quality, pure and recyclable plastic then we will jump at the opportunity. Instantly.

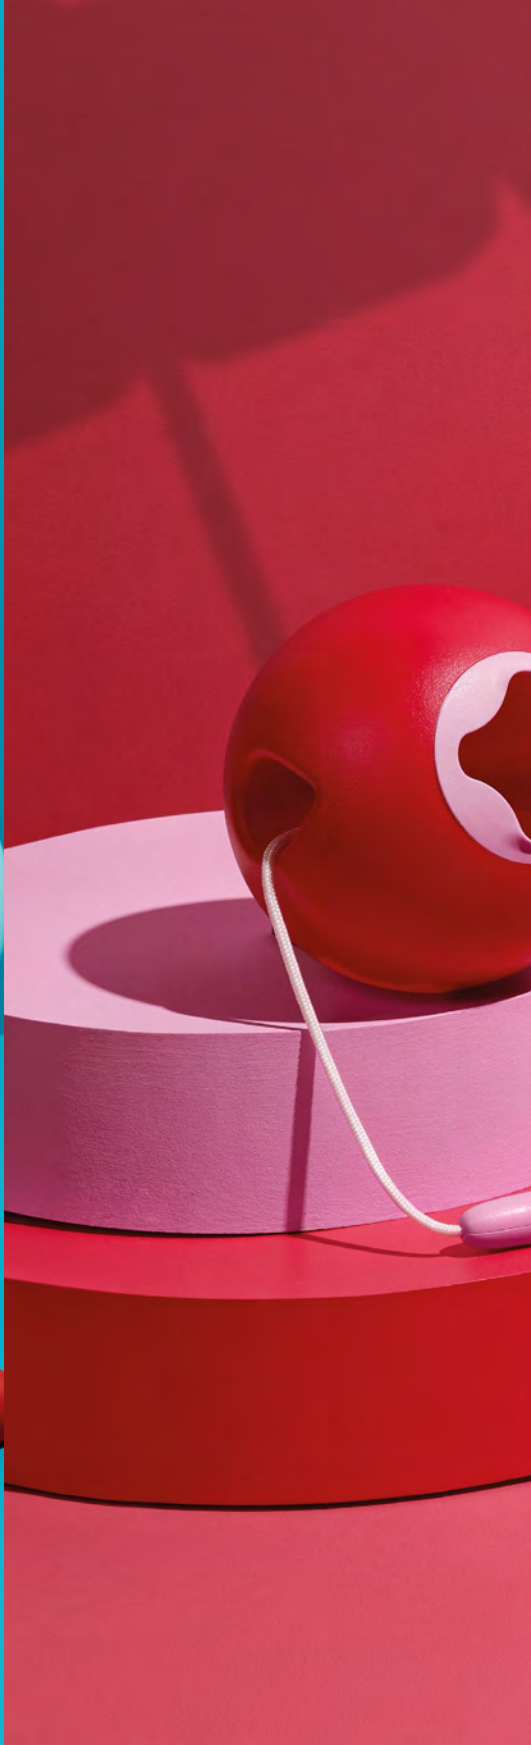

What about the foam materials?

For our play mats and the Quutopia collection we use EVA foam: a super hygienic, soft and child-friendly material. While EVA foam doesn't have the same lifespan as our products in hard plastic, its ecological footprint is still very modest. Thanks to its energy-friendly manufacturing process it is one of the least harmful synthetic materials.

Moreover, the actual life of (bath) toys is often determined by good hygiene and proper maintenance. EVA foam has a closed structure so it doesn't absorb any bath water or dirt of any other kind, preventing the formation of mould. Our sustainability philosophy also extends to packaging because all Quutopia products come flat-packed. This improves eco-efficiency in transport and storage.
